Staff Software Engineer

SKILLS AND TECHNOLOGIES

Languages: JavaScript (ES6+), Java, Python, SQL, HTML/CSS, Shell

Frontend: React, Redux, MUI, React Flow, Highcharts

Backend & Platform: Spring Boot, Node.js, PostgreSQL, Keycloak, AWS, Docker, Git

EXPERIENCE

BlackLine

AI-powered financial operations platform for the Office of the CFO.
Verity Accruals

Staff I Software Engineer

Dec 2025 – Present

Joined BlackLine through its acquisition of WiseLayer, continuing development of Verity Accruals' user-facing application as it integrates into the broader Verity suite.

Alongside direct development, oversee implementation across the stack, integrate other engineers' work, and own regular deployment cycles through production.

Designed and built a visual DAG editor for assembling tabular-data pipelines from configurable nodes, with AI-assisted transform prompting and concurrent SSE-driven run orchestration.

WiseLayer

Venture-backed fintech building AI-powered workers that automate complex finance and accounting workflows.

Staff Software Engineer

Jul 2025 – Dec 2025

Full Stack Engineer

May 2022 – Jul 2025

Joined as employee #5 and built or materially shaped nearly every customer-facing surface as the product evolved from ERP-driven financial dashboards into stateful, recurring accounting workflows.

Built an admin impersonation workflow for client-side QA and issue diagnosis, adapting server-side actor/effective-subject semantics.

Designed the customer-facing audit history for financial workflows, linking derived values to subsequent user actions under tenant- and role-based visibility controls.

Built an in-house error telemetry pipeline to rapidly surface customer-facing failures, improving issue triage, reproduction, and recovery.

OPEN SOURCE

Mist

Tech-accelerator-backed open-source APM tool.

Software Engineer

2022

Built an application performance monitoring tool for locally running Cloudflare Workers using Svelte, Node/Express, OpenTelemetry, Miniflare, and PostgreSQL.

Developed reusable performance visualizations from captured trace data to help developers inspect request timing and identify bottlenecks.

EDUCATION

Codesmith

Advanced Software Residency Program

United States Army Armor School

Armor Crewman - 19K

INTERESTS

Weightlifting - I don't skip leg day

Aku - That's my dog's name

Judo - Throw me

Miniatures - Building and painting

Coffee - Cold, please
